

**General**

Competitively priced, good performance and versatility combined with a compact design are the main characteristics of this new series of valves. The aluminium valve body and spool/seal arrangement optimize both the flow rate and the valve switching time.

This new series of valves are available with G1/8" and G1/4" ports in 3/2, 5/2 and 5/3 versions. Monostable or bistable versions are available and include an integrated technopolymer solenoid operator with 9mm stem and built in manual override

The valves can be supplied with or without the solenoid coil, however, if the solenoid coil is required please refer to the following table:

Voltages		Coil Code	Voltage Code
Direct current DC	24V	MF5	F05
Alternating current AC 50 Hz	24V	MF56	F56
	110V	MF57	F57
	220V	MF58	F58

Connectors Ordering codes			
Voltages		Single connector	Kit 100 pieces
DC/AC	24V	305.11.01L	888.11.01L-K
Alternating current AC 50 - 60 Hz	110V	305.11.02L	888.11.02L-K
	220V	305.11.03L	888.11.03L-K

Construction characteristics

Body	Aluminium
Operators	Technopolymer
	Aluminium for spring bottom plates
Spools	Aluminium
Seals	NBR
Pistons	Technopolymer
Springs	Spring steel

Use and maintenance

These valves have an average life of 15 million cycles depending on the application and air quality, filtered and lubricated air using specified lubricants will dramatically reduce the wear of the seals and ensures long and trouble free operation.

Please ensure that the valve is being used according with the manufacturers specification, such as air pressure and temperature and that exhaust ports 3 & 5 are protected against the possible ingress of dirt or debris.

Repair kits including the spool complete with seals are available for overhauling the valves; however, although this is a simple operation it should be carried out by a competent person.
